PROFESSIONAL SUMMARY

Software Engineer (Engineering Degree in Software Engineering, ESPRIT, 2026 - Master's level) who designed and delivered, as sole developer, a full-stack enterprise platform in 6 months: Java 17, Spring Boot 3, React, Oracle, Keycloak (OAuth2/JWT), Apache Kafka and Docker, with a CI/CD DevSecOps pipeline (GitHub Actions, SonarQube, Trivy). Experienced with Spring Boot microservices and Angular, secure LLM integration through tool calling, and machine learning in Python. Seeking a Software Engineer / Full-Stack / Backend Developer position internationally; available immediately.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, SQL, C#, C++, Dart, PHP

Backend: Spring Boot, Spring Security, JPA/Hibernate, REST APIs, Microservices, Spring Cloud (Eureka, Config), Kafka, WebSocket

Frontend & Mobile: React, Angular, TypeScript, Tailwind CSS, Bootstrap, JavaFX, Flutter, Symfony

Databases: Oracle, MySQL, MongoDB

Security: Keycloak, OAuth2, JWT, RBAC, Rate Limiting

DevOps & Tools: Docker, GitHub Actions, Jenkins, SonarQube, Trivy, Nginx, Git, Maven, Swagger/OpenAPI, Postman, Jira

AI & Data: LLM APIs (OpenAI, Mistral, Groq, Gemini), Tool Calling, scikit-learn, XGBoost, Prophet, SARIMA, pandas, Power BI

Methods: Agile Scrum, UML, Design Patterns (MVC, Repository, DTO), AOP

PROFESSIONAL EXPERIENCE

Software Engineer Intern (Final-Year Engineering Project) - ArabSoft, Tunis

Feb 2026 - Aug 2026

Modernization of the management platform of MASU, a national school accident mutual insurance provider

- Designed and developed, as sole developer, a full-stack web platform (110 React screens, 81 REST controllers, 117 JPA entities) digitizing memberships, accident claims, payments and reimbursements for 3 user roles.
- Reverse-engineered an undocumented legacy Oracle production database and built the application on top of it with zero schema changes, using a layered architecture and DTO/Mapper pattern.
- Secured the platform with Keycloak (OAuth2, JWT, role-based access control) and built a rate limiter (per user and per IP) protecting OTP verification, SMS and AI endpoints against brute-force attacks.
- Built an AI assistant using LLM tool calling (Groq with automatic Mistral failover) where every data access is executed and authorized server-side, preventing SQL injection and data leakage.
- Trained and compared machine learning models in Python: a Random Forest risk classifier (best of 6 models) that reduced monitoring from 442 to 25 schools, plus Prophet and SARIMA forecasts displayed in role-based dashboards.
- Implemented event-driven processing with Apache Kafka and set up a DevSecOps pipeline (GitHub Actions, SonarQube, Trivy, Docker); delivered in 8 Scrum sprints.

Software Developer Intern - Web & Mobile - Sofrecom (Orange Group), Tunis

Jun 2024 - Aug 2024

- Developed a cross-platform mobile application for employee well-being tracking with Flutter and a Spring Boot REST API.
- Implemented user authentication and analytics dashboards for managers in an Agile Scrum team.

ACADEMIC PROJECTS

StageLoop - Internship Platform, team project (Spring Boot, Angular 17, MySQL)

2025

- Owned the Students & Applications module end-to-end: Spring Boot microservice with a REST API, application status workflow, CV upload and generation, scheduled expiry jobs and real-time WebSocket notifications.
- Integrated it via Eureka service discovery and Spring Cloud Config, documented it with Swagger and containerized it with Docker; developed the related Angular screens and Chart.js dashboards.

SportEase - Sports Venues Booking Platform (Java 17, JavaFX, MySQL, Symfony)

2024

- Built the venues & reservations module: venue management, multi-criteria search with auto-completion and Google Maps integration.
- Implemented booking with real-time slot availability preventing double bookings, plus PDF exports (iText) and charts (JFreeChart).

EDUCATION

Engineering Degree in Software Engineering (Master's level)

2021 - 2026

ESPRIT - Private Higher School of Engineering and Technology (Honoris United Universities), Tunis, Tunisia

CERTIFICATIONS

AWS Academy Graduate - Cloud Foundations (Training Badge) - Amazon Web Services

Nov 2025

Hashgraph Developer Course - The Hashgraph Association

Nov 2025
